ALEPH

Design | Koray Malhan & Faruk Malhan

Designed with the workforce in mind, different sizes allow for different needs .

Aleph, which comes in a variation of widths and heights has the ability to adjust to uneven floors with the assistance of invisible adjustable feet. Aleph provides a full extension rail that allows for maximum storage capacity. The sleek design allows for vertical folder storage, while the upper half can be customized to suit your needs for stationary as well as accessories. Aleph can also a lockable solution.

SONG CAISSON

Design | Koray Malhan

Song caisson, proposed as a wheeled member of the Song cabinet series and consisting of stationery units, is designed to offer solutions to storage needs in working environments.

SIZE
L: 428 mm
D: 460 mm
H: 603 mm

The back, front and bottom table are produced as 18mm particle board veneer or 18mm melamine board. Side and top plate is 1mm sheet metal with bending.

The drawer frame is 100% recycled steel with black powder coated finish. Ball nickel plated steel rail system is used and has a load carrying capacity of 20-30 kg. Drawers open partially. There is a central locking system and vertical adjustment on the drawer panel. There is a black plastic pencil holder drawer freely located inside the drawer.

THRESHOLD

Design | Faruk Malhan & Koray Malhan

Threshold Storage series adds to the desking collection to provide a cohesive desking solution as well as a unique standalone shelving system. This bright and airy design was created to allow for light to shine throughout the office space, using the same patterns in nature, the holes represent light shining down between trees in a forest with their irregular shapes and filtering light all the way to the ground. In turn, bringing light into the workspace through the panels.

Threshold provides 4 different heights and 2 widths; Multiple modules of boxes and planters can be added to add vitality to the workspace. the High leg structure offers full cleanability of the product and the ground below. This product uses plywood and recycled aluminum to create a sustainable solution. 5 different wooden tops and 2 color options for metal surfaces and legs, 6 options for modular boxes to choose from.

LUNA

Design | Andreas Krob

A new perspective on functional design in wall systems.
Unpack the packages, follow the instructions and install Luna.
No screws, no pliers, just two people to build the bookcase.

Place the shelves between the steel hoops and they will secure themselves. It's as simple as that. Luna, which has an aesthetic appearance with its balanced stance, provides functional use with its extendable shelf system. It can be used as a television stand, bookcase or divider shelf unit.

Dividing panels

MEGARON

Design | Studio Kairos

Megaron is a dividing panel system that defines open workspace and helps create smaller hubs within a floorplan this series offers professionals the possibility to organize different panel heights, color and texture composition and layouts according to their preferences.

Galvanized steel sheets are bent in ideal geometry to form the Skelton of the panel and then fabric covered. The system is best created in an L, T or Cross shape to allow for better composition. IT comes in 3 heights and only 90 degrees.
